BASSANO, ALBERTA, THURSDAY, NOV. 11, 1915

No. 5

## ARRANGEMENTS TO HOUSE EXHIBITS NOW BEING MADE

Bassano Trading Co. Store Will  
Be Used For Exhibits to  
Coming Convention

The building of the Bassano Trading Company, which is to house the exhibits to the forthcoming Soil Products Exhibition, is now well-wired and prepared to receive exhibits. Collectors displays will come from the Southern Alberta Land Company, Medicine Hat; the Dominion Experimental Farm, Lethbridge; the Demonstration Farm, Strathmore; the Kamloops Agricultural District and the Cypress Hills Water Users Association.

Saenger Wheeler who recently captured first prize for the best exhibit of Marquis wheat at the International Dry Farming Congress at Denver, Colorado, is likely to be an exhibitor at Bassano.

W. M. Bailey, Assistant to the Superintendent of Irrigation, is coming all the way from Ottawa to be present at the Convention.

C. E. Lawrence, President of the Kamloops Farmers' Institute, announces a delegation from that point as well as an exhibit.

In view of the fact that there will be no freight charge on exhibits which are not required to be returned to point of shipment, it is expected that many farmers throughout the Irrigation Block will take advantage of the opportunity to compare their soil products by making exhibits.

The splendid weather that is now existing is allowing the farmers to complete their threshing in record time which will enable them to absent themselves from their farms without interfering with their farm operations.

Thomas Domaille, Acting Weed and Seed Commissioner, Department of Agriculture, Regina, wires for one hundred empty blanks for the Soil Products Exhibition. It is clear that Saskatchewan is going to come up with their best prize exhibits in an endeavor to carry back with them the principal awards.

## SOMEWHERE IN FRANCE

He heard the call "Your King and Country Need You," and now he is somewhere in France.

And the wife felt he ought to go. She and the little ones would manage all right while he was away. Yes, they would get along nicely, for the hearts of the people were touched, and they had promised they would give liberally to the Patriotic Fund so that the women and children of the men who went would be provided for.

He went because he was fit, and because he felt it to be his duty, and he left to those who could not go a sacred charge.

And the war continued, and the months passed. A year went by; another year called having their dear ones too—a sacred charge. And the demands on the Patriotic Fund grew.

The men are still "somewhere in France," fighting their battle and mine. What of the charge they left us? Are we going to help? What are we going to do about it? Have you subscribed as freely as you can to the Patriotic Fund? If not you surely will feel badly about it afterwards. It is the very last opportunity you will have to do so. Don't pass it up.

The editor is very much indebted to G. M. Finck this week for a nice little pocket knife to sharpen his lead pencils with. G. M. appreciates the value of a good sharp pencil and a "scrap of paper."

## COMMITTEE GETS BUSY

At last the local patriotic committee has been appointed and is getting down to work to gather up the \$1500 which has been apportioned to Bow Valley riding as its share in the support of dependents of those who have gone to the front.

The committee appointed, any one of whom is entitled to receive donations toward the fund, is as follows:—Harvey Smith, chairman; John Golden, S. A. Watson, M. E. LeZerte and A. G. Bond. Arrangements have also been made with the accountants of local banks to accept donations and give receipts for same.

While cash is preferable donations of grain will also be accepted at the elevators and applied to the fund.

It is expected that next week meetings in the interest of the fund will be held at Bassano and rural school houses yet to be decided upon.

The committee which it distinctly understood that this is purely a Canadian Patriotic Fund.

## WILL BE OPENED SOME DAY

Another step towards the completion of the post office has been made in the preparation of the plans for the interior fittings. Inspector Devey is naturally very proud of these fittings as they appear on paper, and from his description of them Bassano will be even prouder than he is when they are installed.

The plans show a partition in front of the front door composed of an excellent style of polished wood with wire grating clear to the roof. The boxes will be at the north end of the building and immediately in front of the entrance will be the delivery wicket. Wickets are also provided for the sale of stamps and money orders, the issuing of registered letters, etc., while there will also be drop boxes for both letters and newspapers.

Postmaster Travis will be provided with a handsome office all his own, which will be much better than the one he now has, and in which he will be enabled to keep all data in connection with his work.

Inspector Devey has not yet been informed as to whether the tenders have been let for the work of installing the fittings or not, and consequently cannot say whether the new office will be opened for a Christmas present, a New Year's gift or an Easter offering.

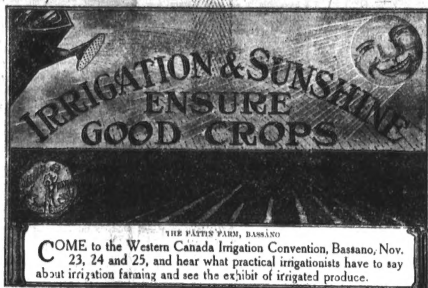

## ANNIVERSARY SERVICES

Anniversary services were held in the Presbyterian church last Sunday when Rev. W. Brookes, the pastor, preached able sermons morning and evening. The congregation in the evening was particularly good and Queen Victoria's 81st birthday was celebrated.

On Monday afternoon a sale of home produced food was held in the student drug store, and in the evening a food supper was held, which latter was well patronized. The pastor promised to call upon us what the receipts of the day were, but, inasmuch as the receipts are not all in yet, he had to break his promise.

P. S.—The editor would have loved to have been mixed up with that home cooking, that home work and food sale, but a couple of brother newspapermen being in town we had to devote our whole attention to them or they might get some. Awfully sorry!

There is some talk of a dance being held in Robinson's hall tomorrow night. Might as well, the music got back to town a week ago last Saturday.

COME to the Western Canada Irrigation Convention, Bassano, Nov. 23, 24 and 25, and hear what practical irrigators have to say about irrigation farming and see the exhibit of irrigated produce.

## BECOMING POPULAR

The men's meetings on Sunday afternoons are becoming more and more popular every week, the attendance increasing every Sunday.

Next Sunday afternoon the subject to be discussed is "Morality and Religion, is there any difference?" The pastor wishes it to be understood that every person at these meetings has the privilege of taking part in the discussion. Interesting music is also a part of the meeting.

## A YOUNG WINTER

In company with Calgary, Winnipeg and all the cities big cities along the line, Bassano this week was awakened to the fact by a slight fall of snow and a gentle little cold snap, that the winter season had really arrived.

On Tuesday a couple of inches of the beautiful fall, and that night the thermometer dropped to the lowest point it has so far reached this winter.

The snow being quite dry and the weather crisp it is not anticipated that threshing operations will be seriously retarded. Fall plowing will, however, be put a stop to for a while.

## ADD TO HONOR ROLL

Reant, L. E., Pte. B.E.F.  
Field, Pte. 3rd Batt.  
Johnson, A. L. P., Lieut. 2nd Batt.  
Klein, Thos., Pte. 10th G.O.R.W.K.  
Wheatley, Fred, Sergt. 56th Batt.  
Wheatley, Jeremiah, Pte. 56th Batt.

JAMES SPEAKMAN

President of the U. F. A., who it is expected will be present at the Irrigation Convention. He may start some fireworks in the way of discussions, as he is not the most ardent advocate of irrigation in the world.

## WHAT IT FEELS LIKE TO BE IN THE TRENCHES

Private C. Deane Douglas Sends  
Letter Home Describing An  
Artillery Duel

The following excerpts from a letter received by his brother C. L. Douglas, has reached here from Pte. C. Deane Douglas, who is now in the trenches in Flanders. After complimenting the postal service on its rapid delivery of mail, Pte. Douglas gives the following interesting description of an artillery duel:—

"I am going to try and give you a vivid description of our first artillery duel. It started off about 2 o'clock in the afternoon. We were all ordered into the dugouts, when, hiss, hiss, hiss, the guns in one of our batteries spoke, then the others took up the strain, each firing independently, but making one continuous roar."

The field guns had been doing all the firing for the first half hour, when our gun came back started in to send Jack Johnson's and coal boxes across, then the fun really did start. The German had started to reply, first you would hear a ghastly shriek of a big shell coming whirling towards you, and you would wonder where it was going to land. All of a sudden there would be a tremendous explosion as it burst 50 or 60 yards away."

Then the rifles and machine guns mixed in with the din, and we were in our dugouts taking it all in. I hardly know how to describe it as it was, but amidst the roar of field guns the shrieking of our own Jack Johnsons coming over our heads, and their coming out of the air to land near the trench, making a most unpleasant explosion which would rock earth and air so you think they were whirling around. To put the final touches on this was the incessant rattling and whizz of machine guns and rifle fire, and bullets were flying over the parapet, but they were harmless as long as you kept your head down."

This lasted for about two hours and of course we were glad when it was all over. A machine gun fired from 400 to 500 yards per minute, and you can imagine what it is like when there are ten going at once. Of course all the noise makes you very excited, your blood runs fast, so that you feel as if you could go through with anything."

The nearest a shell landed to our dugout was about 20 yards and I thought it was the last of it. But they are made pretty strong, and unless a shell lands on top of you are perfectly safe."

Aeroplane flies very calmly over the trenches taking in all day sights, and I expect were signalling down ranges and one thing and another to the batteries. It's all very quiet today so far and we have to rest our nerves up. We are having beautiful weather, thank goodness, as it is not very nice in the trenches when it is wet."

One week from Tuesday and the big event of the season will be on. Every merchant in town will have his hair up in curl papers by about Friday, as the takes about four days for the hair to crimp up right. If the editor isn't wise to this just ask the girls.

## SHALL CHURCHES UNITE?

The vote to determine whether the Presbyterian church of Canada will unite with the Methodists and Congregationalists is now being taken in all parts of the Dominion. Ballots have been distributed among the members and adherents of the local Presbyterian church, and instructions are that they must be returned by December 1. The question will be decided by the votes of Presbyterians all over Canada, and the result will not be officially made known until the general assembly of the church next June.

The proposed basis of union has been accepted by both the Methodists and Congregationalists and was approved by the general assembly of the Presbyterian church at its meeting this autumn. The vote now being taken is the deciding factor, and while it is not known what majority next year's assembly will demand as favorable, it is generally expected that an ample majority will be polled by the vote now being taken.

Ballot box stuffing, ballot switching and all crooked work in connection with the plebiscite will be severely handled.—Ed.

## A FINE MAP

The attention of the Department of the Interior having recently been drawn to the fact that a number of schools throughout Western Canada are lacking in maps illustrative of the general topography of the Province of Alberta, etc., the Honorable Mr. Beale has announced that several useful departmental publications are available for distribution amongst the various educational institutions throughout the Province. Included in the number is an interesting map of the Dominion which shows general information with respect to railways, cities and towns, etc.

In view of present financial conditions and the spirit of economy which is prevalent, advantage is being taken, in a very marked extent, of the opportunity afforded, to procure free of charge literature which can be used advantageously for educational purposes.

Copies of these departmental maps which are adaptable to school use, may be obtained upon application to the Superintendent of the Laidlaw Land Branch of the Department of the Interior, Ottawa.

## AFTER TRAINING, ETC.

A. C. Hathaway, several times of Cochrane in the past, arrived in town on Wednesday evening and will endeavor to guide the Advocate over the troubled sea of destiny.—Cochrane Advocate.

Mr. Hathaway is the devil who has been with The Mail for the past eight weeks. After that much training under us he should make a capable editor. "Troubled sea of destiny" is pretty good.

## BOARD OF TRADE HANDLES NUMBER OF QUESTIONS

Are Elevators All Collecting On  
Government Notes? What  
About Scales in Town?

The Board of Trade met on Wednesday evening of last week, and many matters of considerable interest were attended to. Complaints having been made by farmers handling grain here that the government notes for seed and other relief were being collected here and not at other points, the Board deemed the matter worthy of attention. It was pointed out that if this was permitted the grain would naturally go to three or four elevators and Bassano would lose thereby. The Board notified the secretary to write Bruce Walker, commissioner of irrigation at Winnipeg, the Department of Interior, J. S. Mayor, R. B. Bennett and Nelson Spencer, notifying them of the rumors. With a view to having the matter looked into by the Board. It was also rumored that certain farmers after paying up their own government notes, were purchasing the grain from other farmers and hauling it in the elevators, thus giving farmers with government indebtedness an opportunity to obtain the same grain at a lower price. It was also rumored that certain farmers after paying up their own government notes, were purchasing the grain from other farmers and hauling it in the elevators, thus giving farmers with government indebtedness an opportunity to obtain the same grain at a lower price.

Alleged discrepancies in different scales in town was another matter that came up for discussion. It was pointed out that at times the same load of grain weighed on the Atlas Lumber scales, the Decker & Plummer scales and the Ogilvie scales varied as much as 7 or 8 bushels. In one instance the two former scales weighed practically the same while the Ogilvie scales gave the 7 or 8 bushels less. This matter will be looked into.

The membership of M. S. Stange was transferred to R. A. Travis, the new manager of the Board of Commerce for the unexpired term, and Mr. Findlay will be asked to take an active interest in the work of the Board of Trade. Mr. W. Stange was elected president for the unexpired term of S. A. Watson (resigned).

The completion of the Acme line to Red Deer having been taken up by the Red Deer Board of Trade, it was decided to assure Red Deer that Bassano was heavily in accord with their effort in this regard and would give them its hearty support.

The secretary read a pile of correspondence showing that he had been very busy with the work of the Board during the past month.

## A PIPE DREAM

The Golden 40 C. Star is responsible for the statement that harvesters returning from the district of Bassano report that members of the I. W. W. fraternity are plotting iron bars and sticks of dynamite in the interior of loads of grain to retard threshing. It is indeed passing strange that these harvesters should wander away up into the Interior of British Columbia before casting such queer and yet such serious reflections on the I. W. W. fraternity, and the information should be made to prove their accusations.

Not that The Mail looks any less for the fraternity, for could it be proved that the I. W. W. were actually engaged in such a thing, it would be committed such overt acts The Mail would be among the first to denounce them and their alleged nefarious designs. But inasmuch as no such evidence has so far been reported in this district, it is only fair to play that the Golden Star should give the names of the harvesters, who in turn should recite specific instances and who the suspected parties are. The Mail would be pleased to learn from any trustworthy farmer in the district as to any such occurrences in the neighborhood.

The extract from The Golden Star is as follows:

Harvesters returning to Golden from the vicinity of Bassano report that owing to the machinations of the I. W. W. and other enemies, it is becoming difficult for some farms.

One of the methods employed by the "I. W. W. Club" fraternity is to place railroad spikes and sticks of dynamite in the interior of loads of grain, which pass into the thrasher and demoralize machinery.

## WHY GO TO CHURCH?

Last Sunday morning Rev. W. S. Brookes told his hearers why they should go to church. Of course Mr. Brookes knows, and everybody else knows, that the reasons why every person should go to church are as many and varied as the reasons why every able-bodied man should enlist.

A debate on that subject would be as barren on the negative side as the north side of a mountain is of vegetation. There are practically no reasons whatever why every person should not go to church frequently, and every person sometimes. The church, whatever might be said against it by its opponents, is a wonderful moral factor in any community. Without its influence in the country the chances are that the country would scarcely be worth living in, and the man who does not go to church would probably be the first man to yell his head off if there wasn't a place of worship in the town.

True there may be hypocrites in the church, but there are probably rogues and cheats in business throughout the country, but that is no reason why people should not engage in business. Nor is the fact that there are hypocrites in the church any reason why you should not go to church.

But then what's the use arguing as to the pros and cons of church going? If you have any doubts on the subject just ask that still small voice within you, and if it doesn't answer "yes," then you are a dead one and it won't do you any good to go to church anyway.

## JUST A SUGGESTION

While on the subject of church going! Some wiseacre has said that "there is nothing succeeds like success," and that is true.

Now we hate to criticize anything in connection with the church, but then we can balm our conscience by simply offering the following as a suggestion: Almost every Sunday night when the editor attended church both sides of the Presbyterian church were practically filled to the centre empty, with the result that the preacher finds it almost absolutely essential to talk out of the corners of his mouth to his congregation. This placing of the congregation makes the church appear practically empty, and man, who after all is an egregious animal, loves to be in a bunch. The result is that the casual visitor says to himself, "Oh

well, there aren't many go to church so I think I will stay away."

Sometimes the wisdom of the world can be used to advantage in even a church, and in this respect it might be useful. Theatre managers often find it to their advantage to "dress" their theatres for the first night. That is to spread the people out all over the theatre and make it look like a big crowd. Critics are often fooled in this manner and will tell next day of the big crowd at the "first night," when really there is but a slim crowd. The result is a better crowd for the remainder of the engagement.

The church might very well copy the example of these men. If an usher was employed he might be able to "dress" his seating room to the advantage of the minister at least, as anyway people going to any place alone will naturally slide to the nearest back seat they can find. An usher using a little judgment and common sense could do a remarkable amount of good for a church in this respect, and make the congregation appear much bigger than it is.

We don't think that it's any sacrifice and a means of "fooling" the people, but then the church is quite justified in "fooling" a man to go to church if he can't be made to go any other way. He knows he should go anyway.

## LOOK WHAT'S COMING!

When the Alderton News finds us a "roast" the editor of that paper sends a blue-pencilled copy of it to the News of the Winnipeg Free Press, which cheerfully re-prints it. A word of warning! The editor of The Bulletin is in training for the approaching hockey season and will stand for no more abuse! (We'll attend to the Bulgarian in charge of The Bassano Mail later on.—Brooks Bulletin.)

Surely the editor of The Bulletin doesn't refer to the editor of The Mail as a Bulgarian? As we understand it a Bulgarian has black eyes. The editor of The Mail only had one black eye this week as far as we can remember.

If the following item from The Carmangay Sun was rendered dramatically it could be incorporated with wonderful effect in City Electrician Brown's next address to the Council:

"For this night last week the town people turned the switch, saying: 'Let there be light, and there was no light.' It was an awful trial to spend an evening in the dark, although lights of emergency lamps. It was like living six months' underground waiting for rain."

Owing to the fact that the editor of The Mail got a black eye this week he decided to atone for his sin by devoting his whole editorial columns to the church. Did you ever have a black eye? If you didn't just get one. It's the most glorious sensation you ever witnessed. Stars and angels and beautiful singing and fuses and slot gin rickies and cock tails and punches all mixed together are not in it with one small black eye. In fact a black eye is the greatest thing you could ever hope for.

## SYNOPSIS OF COAL MINING REGULATIONS.

Coal mining rights of the Dominion, on Manitoba, Saskatchewan and Alberta, the Yukon Territory and a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1.00 per acre, not more than 2,500 acres will be leased to one applicant.

Application for a lease must be made to the Minister of the Interior, or to any Sub-Agent of the district in which the rights applied for are situated.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of marketable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will be held on the coal mining rights only, but the lessee may be permitted to purchase whatever valuable mineral rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY

Deputy Minister of the Interior.

S.B.—Unauthorized publication of this advertisement will not be paid for. —06782.

# NINE GOOD REASONS

## Why you should Subscribe to the Canadian Patriotic Fund to the extent of your ability

1. You owe to your country, and to the Empire of which we are a part, either to fight yourself or help to make it possible for others to fight in this supreme struggle.
2. As a Canadian you have enjoyed the protection and privileges of British Citizenship and have never yet been called upon in the defense of the Empire.
3. The Mother Country has for years, practically borne the burden of your protection alone.
4. In this hour of trial we desire Great Britain to realize that every Canadian is supporting and upholding her Cause.
5. The war in which we are engaged is a righteous cause, a struggle for Truth, Liberty and for the sacredness of Treaties and the given word.
6. If you can't go yourself, you can help to make it possible for others to go by guaranteeing that their families will be provided for in their absence.
7. The object of the Canadian Patriotic Fund is to make provision for ALL families of soldiers going from Canada to take part in the present war.
8. Those who have gone to the front are making greater sacrifices than anything we can do at home.
9. An unparalleled crisis in the world's history calls for supreme sacrifice on our part.

## We Must Do Our Duty. We Must Fight or Pay.

### OUR ROLL OF HONOR

Following is the preliminary official Roll of Honor of men who have enlisted from the town of Bassano in the Overseas Expeditionary forces, and is subject to correction or revision.

Any person noting any error or omission will confer a favor by notifying Geo. R. Bond at the town hall of the same in order that the necessary corrections may be inserted in next week's paper:

### Buy an Irrigated Farm from The Canadian Pacific Railway.

**BECAUSE:** Irrigation makes the farmer independent of rain-fall, and insures good crops, not occasionally, but EVERY YEAR.  
Irrigation makes possible the successful culture of alfalfa, the king of fodders, which insures best returns in dairying and mixed farming.  
Irrigation means intensive farming and close settlement, with all the advantages of a densely populated agricultural community.  
Irrigation in the Canadian Pacific Railway Irrigation Block is no longer an experiment, the year 1914 having absolutely demonstrated its success wherever intelligently applied.  
You can buy irrigated land from the Canadian Pacific Railway at prices ranging from \$25 to \$75 per acre, with twenty years to pay, and the privilege of a loan of \$2000 for improvements (6% interest); no principal payment at the end of first or second years and no water rental for first year. Assistance is also given in supplying stock in approved instalments.  
This is the most liberal offer of irrigated farm on record. Get full particulars from
